

## What's New For 2023....

This year we are marking **18 years** since we embarked on our Daylily Journey, and the time spent has been filled with enjoyment , learning, and of course different challenges throughout; but overall our initial purpose for starting our Nursery & Display Garden continues to be fulfilled, that being sharing the appreciation and beauty of Daylilies with collectors, gardeners, and newcomers alike.

Not only have we had the opportunity to meet and learn from some of the very best Hybrdizers, there are so many daylily friends and acquaintances we've met along the way in our travels; likewise we have had the pleasure to do the same here, as we welcomed so many visitors individually or by the busload, to share in this beauty we are blessed with daily.

Because everyone doesn't have the opportunity to visit every year, many are not abreast of any changes we have made, so some things bear repeating year after year, both for previous visitors and those who are just learning about us.

With this in mind, we will be again rolling out posts about our "Policies & Procedures" with regard to our operation.

To start, for the third year we will be continuing what was our conversion from having set open hours, to scheduling appointments for both shopping the Nursery, as well as viewing the Display Garden. This is offset by our scheduled "**Open Garden Events**" which are already available for viewing on Facebook, and in future posts we will provide detail about the Nursery, the Display Garden, as well as our Gift Shoppe.

**For 2023**, our Nursery Season **will commence on June 1<sup>st</sup>**, and our **last day of the season will be August 31**; because of the bloom cycle in our region, the **Display Garden will be available** sometime **between June 1<sup>st</sup> and July 1<sup>st</sup>**, and we will have our **last visitors of the season on August 31<sup>st</sup>** as well.

Please be on the watch for our next post, where we will be providing more information.
